**Oral Manifestations and Considerations**

**Oral**
- Decreased attention span → poor oral hygiene raises potential for increased caries
- Bruxism
- High risk for dental/oral trauma

**Other Potential Disorders/Concerns**
- Oppositional defiant
- Obsessive-compulsive
- Anxiety
- Conduct
- Tic
- Mood (anxiety, depression, bipolar)

---

**Oral Side Effects of Commonly Prescribed Medications**

**Medication:**
- Prescribed based on symptoms for their intended purpose or used off label for associated conditions.
- Some children will go on medication “holidays” during times when they are not in school. Ask if a child has taken medication, and avoid treatment during periods when child is off normal meds.

<table>
<thead>
<tr>
<th>SYMPTOM</th>
<th>MEDICATION</th>
<th>SIDE EFFECTS</th>
</tr>
</thead>
</table>
| Generalized      | Stimulants (Ritalin, Adderall)  
                  | Atomoxetine (Strattera)                                                    | Xerostomia, dysgeusia, bruxism  
                  |                                                     | Xerostomia                                                  |
| Repetitive Behaviors | Antidepressants (Wellbutrin, Tofranil)  
                        |                                                               | Xerostomia, dysgeusia, stomatitis, gingivitis, glossitis, sialadenitis, bruxism, dysphagia, discolored tongue, and oral edema |
| Hyperactivity    | Antihypertensive (Clonidine, Tenex)  | Xerostomia, dysphagia, sialadenitis, dysgeusia                               |
Parent/Caregiver Support and Guidance

- Discourage consumption of cariogenic foods and beverages.
- Prescribe sugar-free medications if available.
- Recommend preventive measures such as topical fluoride and sealants.
- Advise the use of fluoridated toothpaste twice daily and support the family in following dental care instructions.
- Instruct caregiver on appropriate protocol following dental trauma (locate/preserve missing tooth and put in cold milk; seek immediate professional care).
- Recommend rinsing the mouth with water after each dose, especially after taking medications that cause xerostomia.
- Review safety issues appropriate to the age of the child, such as mouth guards to prevent oral-facial trauma.
- Refer to dentist any oral developmental abnormalities.
